

# A fresh perspective

**The Granite Club**, Toronto, ON  
(58' x 172')

OpenAire rose to the challenge laid down by the exclusive Granite Club. The members wanted to minimize the building around their new pool and aquatic play area.

OpenAire helped them realize their dream by creating a building that has a glass roof that can open almost 75% of its area, while half of the outside wall opens 100%.

In keeping with the Granite Club, this building is one of a kind.
